**Executive Summary**

The applicant is requesting a Certificate of Appropriateness in order to add an exterior staircase to an existing second story walkout door. According to the applicant, the stairs, landing, and handrails will be made of wood, with handrails of a simple, square design. The applicant’s submittal is included in Attachment A.

**Design Standards for Historic Properties**

The following *Design Standards* are applicable to the project:

### Historic Residential Porches and Decks

Porches and galleries are, and always have been, the focal point of Galveston houses. They frame and protect the main entrances. They also display a concentration of decorative details. In many neighborhoods, they continue to serve as outdoor living rooms. Some very simple houses, including alley houses, have an uncovered porch or stoop at the entrance.

Most porches are built entirely of wood, in keeping with the frame house construction. There are some exceptions, such as Craftsman-style dwellings that have wooden tapered columns on top of masonry pedestals. A few early frame houses also have cast-iron balustrades that are original.

Preserving front porches is a high priority. Rear and side porches also may be important architectural features, especially for buildings that are located on corner lots, and their preservation is encouraged (although these may also be appropriate locations for new additions.)
3.14 Maintain an original porch or gallery on a house.

*Appropriate*
- Maintain the height and shape of the porch roof.
- Re-open an enclosed rear porch.
- Consider removing a non-historic rear access stair.

*Inappropriate*
- Do not enclose or screen a front porch.

3.15 If necessary, replace damaged porch elements.

*Appropriate*
- Use materials that are similar to the historic building materials.
- An alternative material may be considered for a porch in a secondary location, when the appearance is similar to that of the original. See “Using Alternative Materials on a Historic Structure” on page 31 for more information.

3.16 If necessary, replace damaged porch railings and steps.

*Appropriate*
- Use as much of the original materials and ornamentation as possible.
- Where necessary, replace original railing and step materials with alternative materials that have a similar texture and finish to the original materials.
- Re-install porch rails to match existing rails when appropriate. See the sidebar on “Administrative Approval of Porch Rail Reinstallation.”

*Inappropriate*
- Do not use cast-iron columns and railings where no evidence exists that they were used historically.
- Do not use brick bases for wood columns (exception is Craftsman styles).
- Do not use steel pipe columns.
- Do not use horizontal railings or railings that are too elaborate for the building (of a different style).
- Do not use concrete supports and/or steps.
- Do not relocate front stairs or steps.

---

**Conformance with the Design Standards**

The new landing and stairs are located in Location C: Less Visible Secondary Wall: Preservation is still preferred but additional flexibility exists for compatible replacement or alteration. Historic Sanborn maps do not clearly show a staircase at that location in the past; however, there is an existing second-story door on the west façade with no landing or staircase attached.

Staff finds the addition of a landing and stairs is generally in conformance with the Design Standards since the existing second-story door indicates a staircase and landing were likely present at some point in the past, and because the Design Standards allow some flexibility for less visible facades. Finally, the proposed handrail is a simple, square design that conforms to the Design Guidelines.
Staff Recommendation

Staff recommends Case 20LC-013, request regarding a Certificate of Appropriateness be approved with the following conditions:

**Specific Conditions:**
1. The work shall conform to design, materials, and placement as presented in Exhibit A;

**Standard Conditions:**
2. Any significant alteration from the design approved by the Landmark Commission, shall require the request to be returned to the Commission for review;
3. The applicant shall obtain a building permit prior to beginning construction;
4. Any additional work will require a separate building permit from the Building Division, and may require review by the Landmark Commission and/or the City’s Historic Preservation Officer prior to construction;
5. The Landmark Commission approval shall expire after two years if no progress has been made toward completion of a project unless the applicant files a request for an extension or can show progress toward completion of a project; and,
6. In accordance with Section 10.110 of the Land Development Regulations, should the applicant be aggrieved by the decision of the Landmark Commission, a letter requesting an appeal must be submitted to the Historic Preservation Officer within 10 days of the Commission decision. Additionally, a Zoning Board of Adjustment application must be submitted to the Development Services Department by the next respective deadline date.

Background

In September of 2019, the City Council adopted Ordinance 19-051 amending Chapter 23 of the Code of the City of Galveston, which prohibits the obstruction of any architectural feature by any means. Enforcement of the regulations is now underway. The ordinance allows the Landmark Commission to grant a Certificate of Appropriateness for obscuring architectural features.

Executive Summary

The applicant is requesting approval of a Certificate of Appropriateness for the placement of items, which will obscure architectural features. The proposed items are:
- Two iron planters with plants flanking the entrance.

Code of the City of Galveston, Chapter 23, Article VII, Section 23-114 – Review by the Landmark Commission

The Code of the City states the following:

a. An owner of occupant of a premises covered by this Article may request a Certificate of Appropriateness for the placement of any item which will obscure an architectural feature of the premises.

b. Applications for a Certificate of Appropriateness will be filed with the Department of Development Services on a form prescribed by the department.

c. The Landmark Commission will approve the application for the placement of an item with will obscure an architectural feature upon a finding that:
   i. There is no practical alternative to the placement of the item,
   ii. The placement is done in such a way as to minimize the obscuring of the architectural feature, and
   iii. The placement of the item enhances the appearance of the architectural feature.

Architectural feature is defined as:
*Architectural feature* means the interior or exterior surface of a door along with its hinges and hardware; features on the exterior of the building such as name and or date plates; brick surfaces, cast iron columns; porticos; transoms, entablatures, cornices, escutcheon plates; cast stone, cast-crete, terra cotta, cornerstones, wood framed windows, window hoods of brick, cast iron, sheet metal, wood, or stone; or keystones on any premises within the Strand/Mechanic Historic District.

Obscure is defined as:
*Obscure* means to conceal or prevent from being seen partially or completely.
Conformance with the City Code Requirements

In order to approve, the Landmark Commission has to find that all of the following conditions have been met:

i. There is no practical alternative to the placement of the item,
ii. The placement is done in such a way as to minimize the obscuring of the architectural feature, and
iii. The placement of the item enhances the appearance of the architectural feature.

When making a motion for approval, the Landmark Commission must articulate how each of the above conditions have been met. When making a motion for approval, the Landmark Commission must articulate how any of the conditions are not being met.
